

## Cornstarch Slime

1. Place  $\frac{1}{4}$  cup of white glue into the bowl.
2. Add a few drops of food coloring
3. Add 6 tablespoons of cornstarch and stir until cornstarch is incorporated.
4. If needed add more cornstarch
5. Don't add more than 5-6 more tablespoons. The more corn starch you add the less slimy it will be. Too much cornstarch will make it flaky
6. Mix until all cornstarch is incorporated, then knead to reduce stickiness.
