

Supplies:

- Picture Frame
- Permanent Markers
- Tin Foil

Instructions:

- Take the glass out of your picture frame and lay it over top of your pattern
- Trace your pattern using black permanent marker
- Once your pattern is all the way traced, flip the glass over and color it in on the flip side (This is so that your coloring doesn't remove your black lines on the other side)
- Once that is all done put your glass back in your picture frame with the line side out.
- Take tin foil a little larger than your frame and crumple it into a ball, then unfold it back out so it is textured
- Put your tin foil behind the glass, then put the back of the picture frame back on, folding the tinfoil over the edges of the back and pushing the prongs back down.
- Ta-da! Your masterpiece is complete!
